ABSTRACT

In recognition of the importance of diversity, and in response to numerous requests from the college community, New York City Technical College (NYCTC) developed a profile of fall semester 1989 students enrolled in each curriculum, each academic division, and the entire college, based on students' ethnicity, primary language, and country of origin. Of a total of 11,066 students enrolled in fall 1989, data on ethnicity were available for 64.5% of the students, on primary language spoken for 78.5%, and on country of origin for 27.6% of the students. Following a brief introduction and summary of findings, this report is divided into three sections consisting entirely of data tables and bar graphs. The first section contains data on total fall 1989 enrollment by ethnicity and gender. The second section contains tables presenting the numbers and percentages of males and females within each ethnic group in each of the following enrollment/program categories: Business and Communications Technology, Engineering Technology, Health and Natural Sciences, and Liberal Arts and Sciences, non-degree, unclassified, and bachelor's programs. The final section provides data on the primary language and country of origin for students in each of the enrollment/program categories. Findings include the following: (1) whites comprised 12.1% of the enrollees; (2) nearly 100 countries are represented among the student body; (3) after English, the most frequently cited primary languages were Spanish, French, and Chinese; and (4) outside of the United States, Haiti was the most frequently reported country of origin. (JMC)

INTRODUCTION

The issue of ethnic and cultural diversity has recently received widespread attention within the higher education community. A number of accrediting agencies and state departments of education have included institutional responsiveness to ethnically, culturally and linguistically diverse students among their criteria in evaluating colleges and universities.

For example, Dr. Howard L. Simmons, executive director of the Middle States Association of Colleges and Schools, recently stated that "An institution has the responsibility to provide services that cater to the diverse, special needs of its students. And it is not just a matter of bringing them in and making programs available - not just access, but success."[1] Further evidence of the current emphasis on diversity is found in the Regulations of the Commissioner of Education of the New York State Education Department, which state that "...the admissions process shall encourage the increased participation in collegiate programs at all levels of persons from groups historically under-represented in such programs".[2]

In recognition of the importance of diversity, and in response to numerous requests from the college community, the Office of Institutional Research and Analysis has produced the following report: **Student Profile by Ethnicity, Primary Language and Country of Origin.**

This report consists of a series of tables that present statistics regarding the numbers and percentages of students enrolled in each curriculum, each academic division (as constituted during the fall 1989 semester) and the entire college, according to their ethnicity and gender. Additional tables present the number of students enrolled in each curriculum, division and the college according to primary languages spoken and countries of origin.

The data utilized in constructing the tables were generated from New York City Technical College's **Master Student File** for all students who were officially enrolled at the college during the fall 1989 semester. These data were electronically downloaded with the assistance of the Computer Center, and subsequently manipulated and summarized by the Office of Institutional Research and Analysis through the utilization of various computer software packages.

The original source data were obtained from the **UAPC (University Application Processing Center)** computer tape (for first-time freshmen); and the **City University of New York Race/Ethnicity and Disability Survey** (for continuing students). A copy of this survey appears as the appendix to this report.

Unfortunately, Master Student File data related to the variables under consideration were not available for all of the 11,066 students who were officially enrolled during the fall 1989 semester. However, the percentages of students for whom statistics exist regarding ethnicity (64.5%); primary languages spoken (78.5%); and countries of origin (27.6%) are large enough to provide a fairly accurate student profile.

---

[1] Ed Wiley III, "More Institutions May Be Held Accountable for Diversity Through New Accrediting Emphases", **Black Issues in Higher Education** 7, 5 (May 10, 1990): pp. 1, 8, 25.

[2] Regulations of the Commissioner of Education, Section 52.2(d)(1), Standards for Registration of Undergraduate and Graduate Curricula, as cited in The University of the State of New York, State Education Department, Division of Academic Program Review, **Self-Study Guide, Statewide Review of Two-Year and Community Colleges, 1990-1992**, p. 32.

More specifically, pages 1 through 36 include tables that report enrollment according to ethnicity and gender for the entire college; the divisions of Business and Communications Technology, Engineering Technology, Health and Natural Sciences and Liberal Arts and Sciences; and for students who were nondegree, unclassified and enrolled in the CUNY B.A. program during the fall 1989 semester.

These tables present the numbers and percentages of females, males and total students enrolled in the college, each academic division and each curriculum, according to the following ethnic classification: White, Black/African American, Puerto Rican, Other Hispanic, Asian/Pacific Islander, American Indian/Alaskan Native and Other. They also report the numbers and percentages of respondents and non-respondents in terms of the total enrollment of the particular unit under observation.

For example, the table on page 2 reveals that ethnic data were available for 7,141 of the 11,066 officially enrolled students (64.5%), and that these data were not available for 3,925 students (35.5%). The table further indicates that 12.1% of the respondents are White; 54.7% are Black or African-American; 10.7% are Puerto Rican; 10.7% are of other Hispanic origin; 8.2% are Asian or Pacific Islander; 0.2% are American Indian or Alaskan Native; and 3.5% are "Other".

Pages 37 through 68 include tables that report college-wide, divisional and curricular enrollment according to primary language and country of origin. These tables present the number of individuals who speak the 13 languages and hail from the nearly 100 nations represented among New York City Technical College students. They also include the percentage of respondents representing each language and country in terms of the total enrollment of the particular unit under consideration. A summary of the numbers and percentages of respondents and non-respondents vis-a-vis the total enrollment of the observed unit is presented at the end of each table.

For example, the table on page 38 reveals that on a college-wide basis, the three most frequently spoken primary languages (aside from English) are Spanish (11.0%); French (7.8%); and Chinese (3.6%). The table further reveals that information regarding primary languages spoken was available for 8,688 of the 11,066 officially enrolled students (78.5%), and was not available for 2,378 students (21.5%).

In a similar fashion, the table on pages 39 and 40 indicate that on a college-wide basis, the three most frequently reported countries of origin (aside from the United States) are Haiti (1.8%); Jamaica (1.1%); and Trinidad/Tobago (0.5%). Further, it can be seen from the table that data regarding country of origin were available for 3,051 of the 11,066 officially enrolled students (27.6%) and were not available for 8,015 students (72.4%).

In order to facilitate interpretation of the statistical information contained in the various tables, a number of graphs and charts have been included in the report to illustrate the relationships between and among the percentages of various sub-populations within the student body.

It is hoped that **Student Profile by Ethnicity, Primary Language and Country of Origin** will serve as a useful reference to the New York City Technical College community as it continues in its mission of serving a diverse student population.

Questions regarding this document may be submitted by contacting Dr. Wallace M. Niles, Director of Institutional Research and Analysis in Namm Hall, Room 506, or by calling (718) 260-5420.

APPENDIX

The City University of New York

RACE/ETHNICITY AND DISABILITY SURVEY

The information in question 1 is being collected to meet federal reporting requirements. It is confidential and will be released only in the form of statistical summaries in which individuals are not identified.

Your answer to question 2 is also confidential. Individuals will not be identified except to the Campus Coordinator for Student Health Problems and Disabilities, who will use the information to make appropriate accommodations.

Response to both questions 1 and 2 is voluntary and has no bearing on either admissions or academic decisions.

IMPORTANT DIRECTIONS FOR MARKING THIS FORM

- Use black lead pencil only (no. 2 or softer)
- DO NOT use ink or ball point pens
